

Power Operated Barriers

An effective manner to regulate and control traffic.

Construction

Power operated barriers are suitable for openings of 3.00m to 9.00m.

The housing is virtually vandalism-proof thanks to a solid steel construction.

Because of the many operating options the barrier can be made to comply with all your requirements.

Type BL90

Clear opening 300 - 400 - 500 - 600cm.

Maintenance free housing, standard RAL colour 9010, Include 930 Control board, Ø80mm aluminium arm, red/white stripe reflective.
