

Titan 4

Full Height, Four Arm, Industrial Turnstile

FIVE YEAR GUARANTEE: BASE BEARING & ROTATION LOCKING MECHANISM

Perpetual Base Bearing

No maintenance costs

No service costs

Self lubricating

Anti-Trap System

Ensures complete single cycle rotation

No mid-cycle locking or trapping

Rotation

Free rotation

Mechanically-controlled rotation

Electrically-controlled rotation

Power

220 volts AC

Optional power back-up via UPS

Finishes

UV resistant polyester epoxy powder coat

Hot-dip galvanised & UVRPE PC

Rotalok: Rotation Locking Mechanism

No maintenance costs

No service costs

Zinc-plated for high corrosion resistance

Suspended Rotor Technology

Shock-absorbing rotor-suspension system

Systems Integration

Integrates with all access systems

Purpose-built systems' housings

Internal cabling conduits

Locking

Automatic locking on power failure

Automatic unlocking on power failure

Hot-dip galvanised

304 or 316 marine grade stainless steel
