

Tripod

Waist Height, Three Arm, Industrial Turnstile

FIVE YEAR GUARANTEE: BEARING & ROTATION LOCKING MECHANISM

Rotaslo: Rotation Locking Mechanism

Manual over-ride in the event of power failure

Anti-Trap System

Ensures complete single cycle rotation no trapping at 45 degrees

Perpetual Bearing

Super smooth quite operation

No maintenance costs

No service costs

Self lubricating

No mid-cycle locking or trapping

Suspended Rotor Technology

Shock-absorbing rotor-suspension system

Super-quiet -- buffered solenoids & pawls.

Rotation

Free rotation

Mechanically-controlled rotation

Electrically-controlled rotation

Power

220 volts AC

Optional power back-up via UPS

Finishes

UV resistant polyester epoxy powder coat

Hot-dip galvanised & UVRPE PC

Systems Integration

Integrates with all access systems

Purpose-built systems' housings

Internal cabling conduits

Locking

Automatic locking on power failure

Automatic unlocking on power failure

Hot-dip galvanised

304 or 316 marine grade stainless steel
